The Commissioner of Indian Affairs,
Washington, D.C.

Sir:

I have the honor to acknowledge receipt of Office communication of the 7th instant, bearing above caption, relative to our failure to give annuity and allotment numbers of Indians for identification purposes, and submit the following:

In the space left for identification purposes is found the following: "Allotment, Annuity, Identification Numbers." There is space for only one number on the blank. The number that nearly all the members of the tribes have been given as an identification is their account number. This question was very carefully considered before the census report was made out and it was decided that the account number, since all except the very youngest had these numbers, would be the best number by which to identify the Indians.

These Indians were allotted in 1901 when the total population was only 3713. The population at this time is approximately 5391. The difference between these numbers, if they were all living, would be all the allotment numbers that might be used.

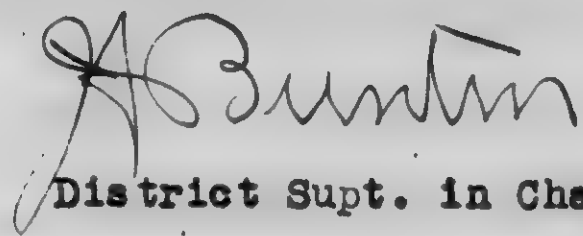

The Wichita, Delaware, Caddo and Fort-Sill Apache tribes have received no annuity payments within the past 15 years, therefore, no annuity numbers could be given for four of the seven tribes on this reservation. Very few over half of the Indians of this reservation could be identified by allotment numbers. The allotment numbers and numbers given on the annuity rolls could not be used to identify the Indians for the reason it has been so long since an annuity payment was made the four tribes and practically 28 years since the allotments were made.

None of the Indians born since 1901 in the Wichita, Caddo and Delaware tribes were allotted. All the Indians except a few of the children, have been given account numbers in a book kept by the Superintendent, Assistant Superintendent

and heads of departments, showing names of Indians, year of birth, allotment file number and account number. The account number is the real identification of the Indians of this reservation. No other number would approach the account number as a means of identifying these Indians. It was for this reason the account number was used. If your Office desires any reference to Indians all that would be necessary would be for you to send this office the account number of the Indian and identification could be made immediately.

Trusting this explanation will be satisfactory, I
am

Respectfully,

District Supt. in Charge.

Mr. John A. Buntin,
Dist. Supt. in Charge,
Kiowa Agency.

NOV -2 1931

Dear Mr. Buntin:

Office records indicate that both allotments and annuity payments have been made at your jurisdiction. In the column on the 1929 census roll in which the allotment and the annuity numbers were to be given it is noted that only one number is shown in a given case. This would indicate that you have not given both the allotment and annuity numbers. Please give an explanation in this connection. If necessary, the rolls will be returned for correction.

Sincerely yours,

Commissioner.
